Passionate Pinky and the Evolutionary Experiment

By Carol Heywood-Babrauskas

Hardcover: 323 pages

Publisher: Rainbow Priestess Creations, Inc. (January 4, 2006)

ISBN: 0977396037

Passionate Pinky and the Evolutionary Experiment is a diary-like book written by the author to enhance the knowledge and emotional well being of others through her own experiences. The author describes Pinky as her Christ-self. She is very in touch with her inner self and her inner feelings and takes you through her inner journeys.

The author claims that her third eye was opened in 1987 and that since then she has been able to see, hear and speak things that most others can only imagine. Although it seems a little more sci-fi than reality, the author stands by her claims and really makes you feel like you are on that beautifully colorful and touching journey with her.

This unique book and spiritual awareness and authenticity will open your mind and open your heart. Although the book may not be for all readers, those looking for a sense of spirituality, those looking for a brighter light at the end of the tunnel, those looking for answers and less questions will truly enjoy this book.

For those seeking a spiritual, emotional title, this book gets 4 stars and is truly a delight to read.
